About This Game

The Dwarves of Glistenveld is a 2.5D Real Time Strategy game with sandbox and RPG elements. Take control of a clan of Dwarves, as they mine, forage, build and fight to retake their homeland from a horde of greedy goblins. Will you unite and cooperate with the other dwarf clans? Or will you take control of a single clan and seek to gain power for yourself?

Story:

Goblins have invaded the land of Glistenveld and the dwarven city Glistenborg is besieged! Flanked on all sides and with their supplies cut off, the surviving dwarves have fled underground. Cut off and divided, the dwarves split into five clans, each with their own strategy to survive. Goblins are now searching the caverns and tunnels under the city to rid the land of all dwarves for good! Can you forge a new clan and unite the dwarves under one banner? Retake your homeland and drive out the goblin horde!

Features:

Campaign

Play through a story-driven single-player campaign, as you help the dwarves drive out the goblins and take back their homeland!

Personality

Every dwarf is unique, with a trait system and generated details that give each unit individual personalities, appearances and behaviours. Watch as your dwarves gain experience working a particular role and level up to gain new abilities!

Scenarios

Experience a series of carefully designed, challenging levels that are not part of the main campaign.

Skirmish Mode

Play through an almost infinite number of generated maps as you choose from a wide range of parameters to customize your own scenario.

Map Editor

Hand-craft and script your own levels and share them on the Steam Workshop.

Mini Games

In our first mini-game, Mobbbit Run, you play as a brave mobbit (an underground critter somewhere between a mole and a rabbit) whose goal is to steal carrots from the goblins.
